

LIBRARY SERVICES

Consolidated Supply of European Publications

Casalini Libri offers rapid and precise supply of European books and journals in all formats and subject areas. Rush ordering and out-of-print searching complete our supply services.

Collection Development Services

Assisting libraries in the development of their collections has always been central to our objectives. Personalised New Title Information is available to librarians free of charge, while our book Approval Plan services give libraries the assurance that professional bibliographers will make selections with book in hand to precise subject, non-subject and budget requirements.

Cataloguing & Technical Services

Cataloguing options range from vendor records to RDA BIBCO records. All records can contain order and invoice data, ToC, and can be remapped as required. Records are created in house by experienced cataloguers who contribute new authority records to the national authority file and make subject and classification proposals through participation in the NACO and SACO programs of the Program for Cooperative Cataloguing (PCC).

Casalini Libri is currently involved in the [BIBFRAME project](#) implementation.

ilibr[®] - Casalini Bibliographical Database

Our bibliographical database is an essential resource for sourcing print and electronic publications of relevance to academic libraries. Title records are enhanced with additional data to aid selection. Online order management tools allow users to select, order, check the status of orders and view invoices easily online.
