

original RDA cataloguing

experience
expertise
innovation

A major bibliographic agency, we produce catalogue records to the standards set by RDA and BIBCO. Detailed attention to authority and identifier management makes us a highly qualified source for libraries.

25 expert cataloguers

with specialist or native skills in various European languages produce original cataloguing for new Italian, French, Spanish, Portuguese and Greek publications.

Our records conform to

- Library of Congress Rule Interpretations
- LC Subject Headings
- LC Classification Schedules
- Subject Cataloguing Manuals

Authority records

and subject & classification proposals are contributed by our cataloguers to the NACO and SACO of the PCC.

Subject headings

are visible to our cataloguing customers on the *ilibri* database as an additional selection tool.

You choose

the level of cataloguing required, from vendor records to full BIBCO Standard Records. Records can be personalised according to your local requirements.

Records are supplied

simultaneously with shipments. Physical processing options are also available for fully shelf-ready books.

We contribute

to a number of international projects as members of EURIG and the Program for Co-operative Cataloguing. We are an ISNI Registration Agency.

Our interest in innovation

has led us to contribute to the Italian translation of RDA. We are currently involved in defining an effective environment for the use of linked data and BIBFRAME by libraries.
